25<sup>th</sup> September 2017

To whom it may concern,

BeMoneyWize was introduced to our Y5/6 classes at Valence Primary by Arinola Araba approximately two years ago. We had received support from Arinola on how to use these games within the class. Children then went on to train others as well.

We have seen an improvement in the pupils' attitude and enjoyment when it comes to solving real life money problems. As learning is closely linked to real life, children find it easier to relate to.

We would recommend the BeMoneyWize game to other primary schools as it is an excellent resource for children to learn, first-hand, about the importance of income and expenditure. There are other resources out there but we found BeMoneyWize worked for us because of the support we received in making it work. The children were visited by the Mayor of B&D as well as a Councillor to see the children engaging in Maths and the visitors were impressed by the level and engagement as well as the explanations that the pupils could provide.

We would like to thank Arinola for her continued support.

Yours Sincerely,

Cindy Bailey

Senior Deputy Headteacher
